SUMMARY

Experienced .NET Developer with over 5 years of expertise in designing and delivering scalable web applications using ASP.NET Core, MVC, REST API, and SQL Server. Highly skilled in backend development, API design, and real-time communication via SignalR. Adept at working in Agile environments and collaborating within cross-functional teams to meet project goals.

SKILLS

- **Backend:** ASP.NET Core, ASP.NET MVC, REST API, Web API, C# programming, Entity Framework, Linq, Ado.net, API optimization
- **Frontend:** React.js, JavaScript, TypeScript, AJAX, TailwindCSS, JQuery
- **Databases:** SQL Server, MySQL
- **Tools:** Git, GitHub, CI/CD
- **Others:** SignalR, Agile methodologies

EXPERIENCE

Software Developer / Careernet | 10/2025 - Current

- As a Software Developer at Careernet, I am currently deployed on a project at Cognizant, where I specialize in building and maintaining scalable enterprise-level applications. My daily responsibilities include developing robust back-end solutions using ASP.NET Core and C#, optimizing RESTful APIs for high performance, and collaborating within an agile team to deliver efficient system enhancements. I frequently work with SQL Server for database management.
- Developed enterprise-level applications using ASP.NET Core to improve user experience and system capabilities.
- Optimized API performance, resulting in improved response times and better resource utilization.

Dot Net Developer / Diyan Technologies Pvt Ltd | 01/2021 - 10/2025

- Developed and optimized RESTful APIs utilizing ASP.NET Core and SQL Server.
- Enhanced application performance and implemented WebSockets for real-time updates.
- Collaborated with cross-functional teams to define and prioritize core features and requirements, ensuring alignment with project goals.
- Mentored junior developers, fostering their technical skills and contributing to hiring process through active participation in technical interviews.

EDUCATION

Bachelor of Computer Application (BCA) | 01/2021

Vrundavan BCA College (HNGU) - Mehsana

PROJECTS

- **Fire Fighter Management** | Role: Backend Developer. Developed a live Firefighter Management System to streamline operations for personnel, equipment, and incident tracking. Designed and implemented RESTful APIs for user management, stock tracking, and incident reporting. Built role-based access control for Admin, Supervisor, Marketing, and Client roles. Tech Stack: ASP.NET Core, C#, SQL Server, REST API, React js
- **Wegodoo** | Task Management Platform. Developed portal interaction for agents and company owners using ASP.NET Core, HTML, CSS, and JavaScript. Improved system response time by integrating WebSockets for real-time notifications. Tech Stack: ASP.NET Core, C#, SQL Server, WebSocket, SignalR
- **Infovores** | Data Analysis Platform. Developed a responsive web application for a global trade analytics platform, enabling users to search shipment data and analyze company trade profiles. Created an interactive dashboard with advanced filtering and data visualization features to identify market opportunities and competitor trends. Tech Stack: ASP.NET Core, Angular 9, SQL Server
- **SOX Assurance** | Compliance Audit Management System. SOXAssure is a SOX Compliance Audit Management and Evidence Documentation System built for Cognizant to streamline internal audit operations. Tech Stack: ASP.NET Core, C#, Web API, SQL Server, HTML, CSS, JavaScript
